LAWN AND GOLF COURSE SEED

Marysville, Ohio

What are the Best Dressed Lawn Makers Wearing?

The man who waits to seed his lawn,
'til coatless he can ramble,
Tho' sure to bolster up his brawn
Makes grass a grev'ous gamble.

While he who rolls his collar high
And seeds while frost is lurking,
Will have a lawn that doesn't die
When Sun and weeds start perking.

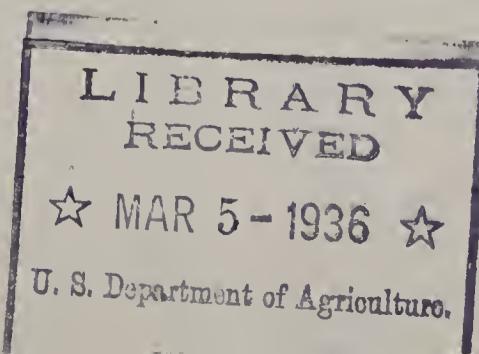

Please don't be too critical of our poetry. We had an idea and it seemed necessary to break into rhyme to express it. All too often the sower of lawn seed has his own comfort at heart - the yard is secondary. Spring seeding is advisable only when it is done early.

If our records serve us rightly you have a Lawn Care binder. Into it we hope you will immediately place the enclosed bulletin, the first for 1936, and the index which gives you a key to the first thirty-seven issues. The yellow index sent at the beginning of last year may now be discarded.

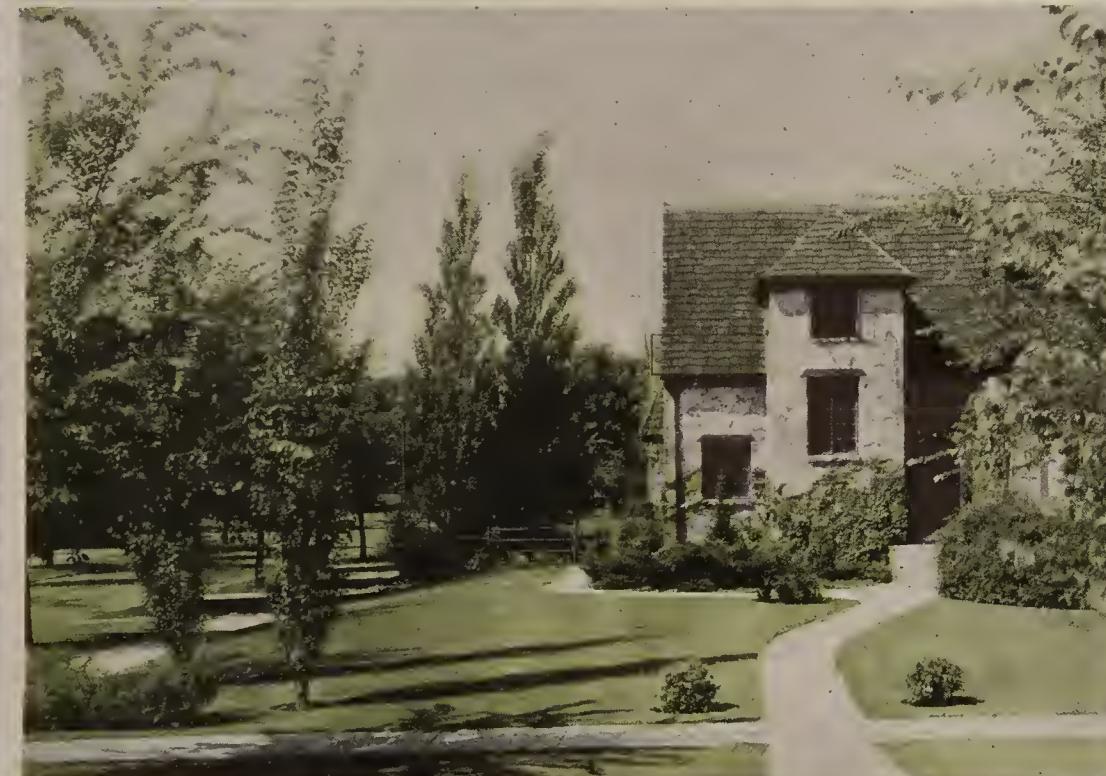

We don't know what your own opinion of White Clover may be but it is a controversial subject each year. For those who like clover in a lawn we offer separately the purest seed that can be obtained. For those who regard it as a pest, we suggest methods of eradication.

The next bulletin will bring you a treatise on Poa Annua, another member of the lawn family which is classified both as friend and foe. For later bulletins no featured topics have yet been selected. Your suggestions will be appreciated. Won't you help us to make Lawn Care the best publication of its kind in existence?

Cordially yours,

O M SCOTT & SONS CO

SIX STATES PRESENT THESE SIX BEAUTIFUL LAWNS

The three at the extreme left in Wisconsin, Connecticut and Ohio were planted with Scott's Creeping Bent Stolons. Scott's Creeping Bent Seed produced the fine lawn in Pennsylvania pictured below. The New York lawn at the lower

right was seeded with Scott's Regular Mixture. Indiana contributes the lawn above which owes its excellence to Scott's Regular and Shade Mixtures. The entire six are fed with Scott's Turf Builder.
